**Art Unit:** 1744

In the specification:

At page 6, line 9, please amend the specification as follows:

Referring now to **Figure 4**, three door contacts **24** are shown. These contacts are placed in one or more of the doors of the room in which the device is operating. The door contacts are switches which disable the device if ~~any~~ any one of the switches is opened, such as by opening the door. The motion detectors **12** are immediately activated upon activation of the device and prior to powering of the ballasts **26** and the bulbs, by means of the time delay **28**. If the motion detectors sense motion at any time during the operation of the device, power to the ballasts and the bulbs is immediately disabled. A preferred embodiment has three 120 ° passive ultrasonic motion detectors located on top of the device.
